Hiring Committee

GenAI Labs

Dear Hiring Team,

I am writing to express my strong interest in the **Generative AI Engineer** position at **GenAI Labs**. With my solid foundation in Python software design, SQLAlchemy data layers, and API routing development, I am eager to contribute to your engineering goals.

In my recent experience as a Junior ML Engineer at AI Innovations Ltd, I developed robust backend integrations using FastAPI and optimized database interactions. I focus on writing clean, modular, and maintainable code that directly aligns with the technical standards at **GenAI Labs**.

I am particularly excited about the chance to apply my skills to the challenges detailed in your job description. I look forward to discussing how my background and qualifications can support your team.

Thank you for your time and consideration.

Sincerely,

Alex Candidate
